SKILLS

- Programming Languages:** Python, Java, SQL, HTML/CSS
- Frontend & Design:** Next.js, React, Streamlit, Figma, UI/UX Design
- Backend & Databases:** Spring Boot, PostgreSQL, Supabase
- Machine Learning & AI:** TensorFlow, PyTorch, Keras, LSTM/GRU Networks, Transformers, Natural Language Processing (NLP)
- Web3 & Blockchain:** Hedera/Hiero Network, Avail Nexus SDK, ENS, Circle MPC, Arc Protocol
- Cloud, DevOps & Tools:** AWS Amplify, Docker, Jenkins, Maven, Git/GitHub, ngrok

LANGUAGES

- Tamil: First Language
- English: Upper Intermediate (B2)

HOBBIES

- Sailing
- Rowing
- Free Diving

PROFILE

CS Engineering student skilled in full-stack development and AI integration. Proficient in Python, Next.js, and AWS, with experience optimizing ML models for financial forecasting and building scalable web applications.

WORK EXPERIENCE

- hxplain**01/2024 - 08/2024
- Customer Relationship Manager
- Managed customer inquiries via email and phone, resolving complaints efficiently to ensure high satisfaction.
 - Cultivated strong client relationships through personalized attention and engagement.
 - Collaborated with sales teams to identify client needs and maintained accurate interaction records in the CRM.
 - Generated actionable reports from customer feedback to discuss trends and improvements in team meetings.
 - Trained new staff on established customer service protocols and best practices.

- Infosys Springboard**02/2026 - 04/2026
- AI/ML Intern (StockTrend Project)
- Developed a Keras-based LSTM neural network with Dropout layers to forecast stock closing prices and effectively mitigate overfitting.
 - Engineered a 60-day look-back window on MinMax-scaled data—validated via rigorous IQR outlier detection—to accurately predict 40 days of trends.
 - Achieved a final Mean Squared Error (MSE) of 0.0926 over 100 training epochs, representing a 77% improvement in initial loss.

ACCOMPLISHMENTS

- Secured first place in PSG Task OPS with a team of four.
- Won many competitions in both sailing and rowing.

PROJECTS

- Gamepayx** — A decentralized game store using Avail Nexus SDK for true cross-chain ownership. Buy in-game items on one blockchain and access them on all supported chains via Avail's Data Availability layer. gamepayx-j00ljy0dv-sanjay-s-projects-49dd4896.vercel.app
- Novavault** — A cross-chain DeFi smart wallet unifying USDC liquidity via Arc/CCTP. Features ENS identity, guardian-based recovery & Circle MPC to prevent permanent fund loss. nova-vault-ten.vercel.app

EDUCATION

Bachelor of Engineering, Computer Science Loyola-icam College of Engineering And Technology, Chennai2024-2027
